EXPERIENCE

**Assistant Manager-Production Planning & Control**  
**Rheinmetall Automotive India PVT LTD (BU Bearings)** *May 2018 - Present*  
**In-House Planning**

- Developed and managed detailed production schedules to ensure timely completion of manufacturing processes.
- Coordinated with production teams to optimize workflow and resource utilization.
- Monitored production progress and adjusted schedules to address delays and changes in production demands.

**Prepare MPS (Master Production Schedule)**

- Developed and maintained the Master Production Schedule to align with sales forecasts and customer demands.
- Integrated sales and operational plans into the MPS to balance production capacity and market requirements.
- Reviewed and adjusted the MPS periodically to address changes in demand and production capabilities.

**Raw Material Planning**

- Analyzed production requirements and created raw material plans to meet manufacturing needs.
- Coordinated with suppliers to ensure timely delivery of raw materials and maintained optimal inventory levels.
- Monitored raw material usage and adjusted orders based on production fluctuations and inventory policies.

**SAP MRP Related Activities**

- Utilized SAP MRP (Material Requirements Planning) to generate and manage production schedules and procurement plans.
- Conducted regular MRP runs in SAP to update production plans and ensure alignment with demand forecasts.
- Troubleshoot and resolved issues related to SAP MRP processes and data accuracy.

**Material Movement in SAP**

- Oversaw the tracking and management of material movements in SAP, including transfers, issues, and receipts.
- Ensured accurate and timely updates of material transactions in SAP to maintain inventory accuracy.
- Collaborated with logistics and warehouse teams to optimize material flow and minimize handling times.

**Inventory Management**

- Implemented and maintained effective inventory management practices to ensure optimal stock levels.
- Conducted regular inventory audits and cycle counts to verify stock accuracy and identify discrepancies.
- Developed and executed strategies to reduce excess inventory and improve turnover rates.

**Additional Responsibilities**

- Prepared regular reports on production performance, inventory status, and material planning metrics.
- **Automated end-to-end production scheduling** by implementing AI-driven models to generate daily, weekly, and monthly plans, reducing manual planning time and increasing forecast accuracy.
- **Engineered a dynamic Plan vs. Actual dashboard** to monitor real-time production variances, enabling data-backed decision-making and rapid response to supply chain disruptions.

## Senior Associate (PPC DEPARTMENT)

**TATA MOTORS, PUNE** Jun 2014 - Apr 2018

- **Production Planning:** Established and monitored production plans based on sales data, ensuring 100% schedule adherence.
- **TCF Line Sequencing:** Managed daily sequencing of aggregates for the **Xenon Trim, Chassis, and Final (TCF) lines** to achieve high-volume production targets.
- **Assembly Flow Optimization:** Monitored TCF line constraints and provided real-time feedback to stakeholders to ensure a smooth flow from Trim assembly to Final vehicle rollout.
- **Cross-Functional Coordination:** Coordinated closely with **Production, Quality, and Logistics teams** to resolve line bottlenecks and ensure timely vehicle dispatch.
- **Manufacturing Planning:** Developed Monthly, Weekly, and 3-Day production plans to maximize shop floor productivity.
- **Systems Management:** Expertly used SAP IPMS (Integrated Production Management System) and aggregate scanning for real-time production tracking.
- **Supply Chain Coordination:** Released schedules to suppliers and maintained strong relationships to ensure a steady flow of materials.
- **Shortage Management:** Took direct follow-up with vendors and visited vendor sites to resolve critical material shortages and process issues.
- **Quality & Compliance:** Implemented **WCQ** (World Class Quality) under the SLT pillar and monitored **SRT** parameters for daily, weekly, and monthly compliance.
- **Data Integrity:** Maintained up-to-date and accurate production information data to support management reviews and audits.

## EDUCATION

---

### Diploma in Mechanical Engineering

**RM CET, Ratnagiri** Jun 2010 - May 2013

### SAP PP/MM

**Pune Institute of SAP** May 2019 - Oct 2019

### HSC

**BNSP Jr.college, Banda** May 2010

### SSC

**BNSP High School, Degave, Sawantwadi** May 2008

## AWARDS

---

### Awarded for Excellence in Digital Transformation Using AI

2026-02-02

- **AI-Driven Automation:** Spearheaded the transition of PPC/SCM reporting from manual entry to fully automated, AI-driven workflows.
- **Autonomous Planning:** Engineered AI models to generate daily, weekly, and monthly production plans, significantly reducing manual planning time and increasing forecast accuracy.
- **Real-Time Analytics:** Developed a dynamic **Plan vs. Actual Dashboard** to monitor production variances in real-time, enabling data-backed responses to supply chain disruptions.
- **Award-Winning Impact:** Recognized with an excellence award in 2026 for successfully leading this digital transformation in manufacturing.
